

## Summary of Estimated Tonnage and Diamond Results - Renard 2, 3, 4 and 9

Kimberlitic Body	Deepest Drill Intersection (metres below surface)	Estimated Tonnage				DMS Results - May 2004 to Present		Estimated Number of Carats (millions)
		(million tonnes) (note 1)				Weight of Sample (tonnes)	Estimated Diamond Content of Sample (cpht)	
		Drill-Indicated	Projected		Total			
Low	High							
Renard 2	565	6.5	3.4	5.9	9.9 to 12.4	182	92	9.1 to 11.4
Renard 3	360	1.7	0.3	0.4	2.0 to 2.1	160	124	2.5 to 2.6
Renard 4	302	6.1	1.6	2.9	7.7 to 9.0	219	53	4.1 to 4.8
Renard 9	364	3.2	0.4	0.8	3.6 to 4.0	83.5	52	1.9 to 2.1
<b>Totals</b>		<b>17.5</b>	<b>5.7</b>	<b>10</b>	<b>23.2 to 27.5</b>			<b>17.6 to 20.9</b>

Note 1: Tonnage estimated by Wardrop Engineering Inc.

Note 2: The estimated tonnage of Renard 2, 3, 4 and 9 and the estimated number of carats contained in these bodies are conceptual in nature, and do not conform to the definition of a "mineral resource" established by National Instrument 43-101. Further exploration will not necessarily provide the basis for determining a mineral resource. For complete details on how these estimates were obtained, please see the news release dated November 8, 2005.
